Subject: RE: draft SH Bell fact sheet
Attachments: SH Bell FactSheet December 2018 PC RB MWR.DOCX

Sam,

I accepted the changes from Phillippa, Rachel and Mike. So attached is the cleaned-up version. Please add appropriate language about the manganese cleanup since we've agreed that we'll hold the fact sheet back until SH Bell gets their letter. (Forwarded below is Mike's earlier email with his comments – for your reference.)

Your insertion – which should probably be the first sentence – would also probably change the title on the fact sheet since “evaluation of data” would become a secondary message. We could also edit out a sentence or two since there's a bit of repetition about “evaluating.” Don't worry about text overflowing out of the column. We can do a 2-page fact sheet and use space on the back for a photo. (The Spanish version will need more space anyway.)

After your insertions, I'll route this to the editors on 19th floor.

I think the fact sheet needs 1-2 sentences regarding our findings. We mention lead once in passing and don't even mention the health threats for lead. Also, weren't we going to mention that we will be cleaning up homes with manganese above the RML of 5,500 mg/kg and further assessing the lead data?

I've made some changes bringing the language from the viewer over. I also thing the link to website should be more promenant.

If it's not too late, I had a few minor edits, attached. Please let me know as soon as this is final. I will send to an interested reporter.

Thanks,
Rachel

I had a couple of wording changes such as "more than" instead of "over" so we are not using "over" twice in the same sentence.

I made another sentence more active.

Subject: draft SH Bell fact sheet

Please review / comment on the attached draft. I don't think we should have a public meeting right now, but we could mail out a fact sheet to the target area. If there is a way to be a bit more precise about our next step, please recommend suitable language. We can fill in empty space at the bottom with a photo of a worker sampling. Do we have one?
